Get Connected.

Upgrade Your Lending Technology Software

OmniaCnct is an integrated, API-ready suite that brings together payments, borrower communication, and verification in one seamless platform. Built for operational speed, compliance, and borrower satisfaction, OmniaCnct empowers lenders to serve more customers with less effort.

 **omniapay**
Connected Payments

Streamline your ACH, credit, and debit card processing with a single, secure login. OmniaPay centralizes payment activity and reporting, giving you full control and transparency, while simplifying daily operations and improving financial oversight across your organization.

- Real-time transaction reporting
- Automated account reconciliation
- Reduces staff workload and manual errors
- Boosts back-office efficiency
- Supports recurring payments and flexible scheduling

 **omniatext**
Connected Communications

Stay connected with borrowers using automated alerts, payment reminders, and promotional messages—all triggered by custom workflows. With OmniaText, you can improve repayment rates and enhance the borrower experience.

- Real-time SMS notifications
- Customizable workflow triggers
- Reduces missed payments
- Supports borrower retention and satisfaction
- Improves response rates with targeted engagement

omniaverify

Connected Intelligence

Speed and accuracy are critical in borrower verification. OmniaVerify combines two intelligent tools, **OmniaVerify Scan & OmniaVerify Peep**, to accelerate identity checks, ensure KYC compliance, confirm identity assurance, and strengthen fraud detection, helping you reduce exposure to borrower risk with confidence.

OmniaVerify Scan (AI-Driven Fraud Detection)

Fraud is evolving and AI is leading the charge. OmniaVerify Scan is designed specifically for lending environments, using advanced AI technology and forensic metadata analysis to detect subtle digital irregularities and report hidden manipulation in IDs, paystubs, and bank statements in real time. It never reuses customer data, ensuring privacy and compliance.

- Detect fraudulent documents and tampered images using advanced AI
- Automate document checks and reduce manual reviews for quicker decisions
- Allow genuine borrowers through while confidently filtering out fraud
- Simple explanations of detected irregularities eliminate the need for training
- Continuously adapts to evolving fraud tactics with real-time intelligence

OmniaVerify Peep (Bank & Identity Verification)

OmniaVerify Peep streamlines identity verification and banking data access by connecting directly to a borrower's financial accounts in real time. Built on bank-grade security and compliance standards, it provides lenders with instant access to verified information—reducing fraud risk while accelerating approvals.

- Connects directly to borrower bank accounts in seconds
- Confirms account ownership, balance, and transaction history in real-time
- Reduces manual document collection and review
- Supports fast, compliant onboarding that meets KYC and AML standards
- Enhances borrower experience with a frictionless verification process
